front bumper of the car that struck him. The victim dislodged the bicycle and was then immediately struck by the accused's vehicle a second time. This impact ploughed the bicycle and cyclist forward some 3m. After having finally stopped motor vehicle, the accused reversed some 3 to 4m and then proceeded forward, veering to the right to avoid the fallen cyclist.

The accused began to speed away from the scene of the crash.

The victim was able to get up and began to run at the fleeing motor vehicle.

The victim jumped at the fleeing motor vehicle and latched onto the driver's side. One arm wrapped around the driver's side view mirror and the other clinging to the driver's door sill.

The victim remained attached to the driver's side of the vehicle even as the accused continued to accelerate forward.

The accused then veered to the south side of Bloor St. W. approaching the south curb with some speed.

The accused's motor vehicle then abruptly changed direction and began to travel westbound again along the south curb of Bloor St. W. in the eastbound lane of Bloor St. W.

The victim, still clinging onto the driver's side of the vehicle struck a fire hydrant situated very closely to the south curb. The impact with the fire hydrant caused the victim to relinquish his grip on the side of the vehicle and was thrown forward through the air. The victim landed head first onto the road surface.
